

Intermediate Term Bond Account III

Invests in the Western Asset Core Plus Bond Fund - IS Shrs

Benchmark Morningstar US Core Plus Bd TR USD

Investment objective and strategy

The investment seeks to maximize total return by investing to obtain the average duration of an intermediate-term bond. The fund invests in fixed income securities of various maturities and will invest at least 80% of its net assets in debt and fixed income securities rated Baa or BBB Categories or above. Generally the target dollar-weighted average effective duration for the fund is expected to range within 3-7 years. Effective duration seeks to measure the expected sensitivity of market price to changes in interest rates, taking into account the anticipated effects of structural complexities. The fund may invest up to 25% of assets in the securities of non-U.S. issuers. The fund may also invest a portion of its assets in mortgage-backed and asset-backed securities.

Category - Intermediate-Term Bond

Intermediate-term bond portfolios invest primarily in corporate and other investment-grade U.S. fixed-income issues and typically have durations of 3.5 to 6.0 years. These portfolios are less sensitive to interest rates, and therefore less volatile, than portfolios that have longer durations. Morningstar calculates monthly breakpoints using the effective duration of the Morningstar Core Bond Index in determining duration assignment. Intermediate-term is defined as 75% to 125% of the three-year average effective duration of the MCBFI.
