

2015 Target Retirement Account IV

Invests in the American Funds 2015 Trgt Date Retirement R6
Benchmark Morningstar Lifetime Mod 2015 TR USD

Investment objective and strategy

The objective of this account is to seek growth of capital and current income consistent with its current asset allocation. The portfolio employs a passive asset allocation strategy that becomes more conservative as investors near retirement in or within a few years of 2015. By 2015, the portfolio's asset allocation will invest 80% of assets that pursue income and 20% that pursue growth. Because different asset classes perform differently, over time, the portfolio's allocation will become out of balance. When this happens, the investment manager rebalances the portfolio returning it to its proper asset allocation.

Category - Target-Date 2015

Target-date portfolios provide diversified exposure to stocks, bonds, and cash for those investors who have a specific date in mind (in this case, the years 2011-2015) for retirement. These portfolios aim to provide investors with an optimal level of return and risk, based solely on the target date. Management adjusts the allocation among asset classes to more-conservative mixes as the target date approaches, following a preset glide path. A target-date portfolio is part of a series of funds offering multiple retirement dates to investors.

Investment glide path
