

2035 Target Retirement Account IV

Invests in the American Funds 2035 Trgt Date Retirement R6
Benchmark Morningstar Lifetime Mod 2035 TR USD

Investment objective and strategy

The underlying fund invests in a mix of American Funds mutual funds according to an asset allocation strategy designed for investors planning to retire and leave the workforce in or within a few years of the target date. It seeks growth, income and conservation of capital consistent with this allocation strategy. The fund will increasingly emphasize income and conservation of capital by investing a greater portion of its assets in fixed income, equity-income and balanced funds as it approaches and passes its target date. The fund's 30-year through retirement asset allocation strategy is also intended to provide equity exposure to deliver capital growth potential throughout retirement.

Category - Target-Date 2035

Target-date portfolios provide diversified exposure to stocks, bonds, and cash for those investors who have a specific date in mind (in this case, the years 2031-2035) for retirement. These portfolios aim to provide investors with an optimal level of return and risk, based solely on the target date. Management adjusts the allocation among asset classes to more-conservative mixes as the target date approaches, following a preset glide path. A target-date portfolio is part of a series of funds offering multiple retirement dates to investors.
